BizPay Zingtree API

Corpay PMG (Paymerang) dev endpoints for the Small Balance workflow. Spec from Mayur Palankar (10/16), validated live from Zingtree on 10/19–10/20.

Base URL	`https://develop.api.pega.dev.paymerang.com`
Environment	Dev only. Zingtree static IPs are whitelisted.
Auth	OAuth2 client credentials (Paymerang Auth0 dev tenant), handled by the Zingtree data source **BizPay Dev (Paymerang)**. No credential lives in a tree.
Zingtree objects	GET → Connected Object 1299 `bizpay__get_payment_by_id` POST → Connected Object 1300 `bizpay__post_payment_action` (header `Content-Type: application/json`)
Test tree	240421244 (org 604910). Test IDs: `test_payment_ids_2026-10-19.csv` (100 IDs, fee 0).

ENDPOINTS

GET `/payments/zingtree/{payment_id}` — Payment and card details

Path parameter

NAME	TYPE	NOTES
payment_id	integer	BizPay payment ID. Zingtree merges the form field `payment_id`.

Response 200

FIELD	TYPE	USE IN SMALL BALANCE
payment_id	integer	Echoes the request.
client_id	integer	Client branch.
client_name	string	Client branch (IPay, Civitas, other).
vendor_id	integer	
client_vendor_id	integer	
payment_amount	number	Upper limit for POST `amount`.
service_fee	number	Fee check. POST `fee` must match.

funding_amount	number	
manual_value_load_amount	number	
remaining_balance	number	Calculated by BizPay. Replaces the agent's manual math.
card_status	string (enum)	See values below.
card_status_date	string (YYYY-MM-DD)	Card-age logic.
cancel_card_request_exists	boolean	Existing request check.
cancel_card_request_approved	boolean	Existing request check.
pega_case_id	string	Empty when no Pega case.

card_status values

- Created
- Waiting
- Locked
- Processing
- Completed
- On Hold
- Error
- Converted
- Cancelled
- Unloaded

Example (live, payment 36216797)

```
{
  "payment_id": 36216797,
  "client_id": 2665,
  "client_name": "Acetic Urchin",
  "vendor_id": 5310609,
  "client_vendor_id": 831532,
  "payment_amount": 565.53,
  "service_fee": 0,
  "funding_amount": 565.53,
  "manual_value_load_amount": 0,
  "remaining_balance": 565.53,
  "card_status": "Created",
  "card_status_date": "2024-11-06",
  "cancel_card_request_exists": false,
  "cancel_card_request_approved": false,
  "pega_case_id": ""
}
```

Responses

CODE	MEANING
200	Payment found. Body as above.

404	`{"message":"Payment not found","error":"No payment found with Id …"}`. Also returned when the payment has no card payment record.

POST /payments/zingtree/{payment_id}/actions

Cancel the card on a payment

Irreversible. A successful POST cancels the card and changes the payment's status. Each test ID can be used once.

Request body

FIELD	TYPE	SOURCE	RULE
action	string	fixed	Always `cancel_card`.
resolution	string (enum)	tree decides	See values below.
cancel_card_reason	string (enum)	tree decides	Exact match to one of BizPay's 40 reasons.
amount	number	from GET	≤ `payment_amount`.
fee	number	from GET	= `service_fee` (remaining fee).
payment_note	string	agent enters	Free text. No double quotes.
agent_email	string	agent	Must be an existing BizPay user (audit). Mayur creates dev users.

resolution values

- `reissue_check`
- `cancel_fee`
- `cancel_fee_under_1`
- `partial_refund`
- `full_refund`
- `reissue_rpps`
- `reissue_check_cancel_fee`

Example request

```
{
  "action": "cancel_card",
  "resolution": "reissue_check",
  "cancel_card_reason": "Vendor does not accept card payments",
  "amount": 565.53,
  "fee": 0.00,
  "payment_note": "Text for Payment Notes",
  "agent_email": "agent@corpay.com"
}
```

Responses

CODE	BODY	STATUS
2xx	`{"success":true,"message":"Cancelled Card Payment with Id …","request_id":4817}`	From spec. Not seen live yet.
400	`{"message":"Payment not found","error":"No payment found with Id …"}`	Seen live.
400	`{"message":"Invalid user","error":"The provided user name does not correspond to a valid system user."}`	Seen live. `agent_email` not a BizPay user.
4xx	Amount above record or fee mismatch	Per Mayur. Not seen live yet.
415	Unsupported media type	Seen when the `Content-Type` header is missing. Fixed on CO 1300.

CANCEL CARD REASONS (40)

VALUE
